FOR IMMEDIATE RELEASE

FLIGHTLINE GROUP, INC. BEGINS WORK ON 26,000SF STATE-OF-THE-ART AIRCRAFT SERVICE FACILITY Service Facility Marks the First in Over \$20 Million in Infrastructure Investment

TALLAHASSEE, Fla., August 23, 2007 – Flightline Group, Inc. today announced that work is set to begin on their new 26,000sf Regional Service Facility. The regional service facility is the largest general aviation development and construction project ever undertaken at the Tallahassee Regional Airport. The beginning of work on the Regional Service Facility marks the launch of the Company's long-term site plan that includes \$20,000,000 in additional development investment by Flightline Group and their city and airport partners over the coming four years.

"Bringing world-class aviation service and facilities to Tallahassee, the State of Florida and the Southeastern U.S. for all aircraft owners and operators has been among our highest priorities consistently throughout our 25 year history," said Mac Langston, Chairman and CEO of Flightline Group. "This new facility will help redefine services provided to general aviation in the region. We are grateful to our tremendous staff, industry and airport partners, community leadership, and to our dedicated customers for making it possible."

Three months ago, the Company held a celebration to commemorate 25 extraordinary years in aviation and to officially memorialize the groundbreaking of the unique service facility. Equipped with golden shovels, 15 members of the Flightline-family memorialized the transition from three years of planning to the 12-month construction project. The groundbreaking team officially broke ground on the site for the new 26,000sf aviation technical service center which will maintain general aviation aircraft and the emerging new generation of light jets. The facility will include high-speed and latest-technology communications and management capabilities and will feature a state-of-the-art parts sales service and technical library. In the coming weeks, crews will begin to prepare the site for full-construction by expanding access and parking for the facility, bringing the site up to the latest EPA and state environmental codes, installing under-ground electric and fiber-optic communications provisions, and expanding the airport security area and fencing to accommodate the new facility's needs. Flightline Group is an approved service organization for Piper Aircraft, Inc., Cessna Aircraft, and Cirrus Design Corp.

“The new Regional Service Facility is an excellent example of Flightline’s dedication to continuing to raise the bar on aviation services, as symbolized by our rich 25 year heritage” noted C. Daniel Langston, Flightline’s President. “The new Regional Service Facility marks the first in our four-year, \$20 Million development plan at TLH, which will, upon completion, set a new standard for business and personal aviation in the industry.” The completed development plan includes a training facility and Center of Excellence for DayJet, the sales and service facility for HondaJet SouthEast, expanded on-airport business facilities, and a business-class hotel.

Over the years, Flightline has grown from its roots in helicopter aeromedical and charter flight operations to become one of the premier aviation sales and service organizations in the United States. Flightline, through their affiliate company “SouthEast Piper”, currently represents the Piper product line, including the PiperJet, throughout the Southeastern states of Florida, Georgia, Alabama, Mississippi, Louisiana, Georgia and Tennessee, plus Arkansas for the PiperJet. Also, the Company, through their affiliate companies “HondaJet East” and “HondaJet Southeast”, is the representative for Honda Aircraft Company for a 23-state territory, from Florida, north across the Eastern Seaboard, to the northern border of Maine, for sales and service of the HondaJet.

Flightline Group, Inc., established in 1982, is comprised of 7 family companies: Flightline Tallahassee, Flightline Development Corp., Flightline Okaloosa, SouthEast Piper, Piper Parts Plus (P3), HondaJet East & HondaJet Southeast. Dedicated to providing extraordinary line services, aircraft sales, parts sales and aircraft maintenance services to the aviation industry, Flightline Group and its subsidiaries employ over 80 aviation professionals at facilities in Tallahassee, FL (TLH), Okaloosa County, FL (VPS), Vero Beach, FL (VRB), Memphis, TN (MEM), and Atlanta, GA (FFC).
